

Ancient Egyptian Party Time

You are an Egyptian Pharaoh and you are going to plan a party for your family and friends. It has to be the BEST party ever!

Your party **MUST** include **EACH** of these items:

- Musicians – at least 1, but any more than that is up to you
- Dancers – at least 1, but any more than that is up to you
- Perfume cones – worn on guests' heads as they walk in
- 3 items of food – the fancier the better
- 2 types of drink – the fancier the better
- 2 pieces of entertainment – one **MUST** be water-based

Each item has a cost with it. You have a budget of 40 debens. You **CANNOT** go over this budget or the gods will be furious at you!

Each item also has a set of rating points with it from one of three factors:

- Entertainment
- Power
- Food and drink

You must decide which rating you think is most important:

- Do you want to be known as a great entertainer?
- Do you want everyone to think you are incredibly powerful?
- Do you want everyone to know you serve the best food and drink?
- Or do you want to try and find a balance between all 3 of them?

Once you have worked out your total costs and made sure you are in budget, then you can add up all of your ratings to see which one has the biggest amount of points. Compare your party with other people's around you.
